Established: 1995
Ownership: Private

Mission Statement:
Provide organizations across
North America with complete
Internet solutions backed by a
dedicated team of professionals
in order to satisfy the growing
needs of business clients.

Background Information

Internet Light and Power Inc., a premier Internet Service Provider, was founded in February 1995. Through constant technical innovation and service excellence, Internet Light and Power has established itself as a leading Internet Service Provider in North America.

Internet Light and Power serves a broad client base in a variety of sectors, including entertainment and media, manufacturing and engineering, retail, financial services and arts and education.

iPermitMail™ is a new innovative anti-spam technology developed by Internet Light and Power that provides several levels of protection from unauthorized bulk email (“spam”). By combining the power of a white list, which ensures that important clients and other contacts will not be blocked, with patent-pending Adaptive Inheritance Technology, users now have complete control over their inbox.

By analyzing and matching each piece of email against a permitted sender database, users can be sure that the email they receive is legitimate. iPermitMail can be setup in minutes and requires no software downloads or complex installation procedures. iPermitMail is online and ready to use in minutes.
