Your Complete Business Solution Provider

The tremendous growth of the Internet has unlocked countless business opportunities for both emerging and established organizations. Developing a strategy to utilize this global medium will allow you to effectively market and communicate information to your clients as well as your employees. From connecting your organization to the Internet to developing a comprehensive online application or web presence, Internet Light and Power Inc. is your complete Internet Solution Provider.

Who we are

Internet Light and Power Inc., a premier Internet Service Provider, was founded in 1995. Through constant technical innovation and service excellence, Internet Light and Power has established itself as a leading Internet Service Provider in North America. Our solutions exceed the industry standards for performance and we back these claims with superior Service Level Agreements.

We serve a broad client base in a variety of sectors, including entertainment and media, manufacturing and engineering, retail, financial services and arts and education. Some of the solutions we have provided these organizations range from high-speed Internet access to the creation of online business systems and network security.

Our organization has made substantial investments and will continue to make significant investments in our hardware, software, and people to ensure clients receive a high-quality, reliable Internet experience. Our 99.9% uptime guarantee, state-of-the-art data centre, and highly-trained support professionals are examples of our commitment to reliable service.

Our technical, administrative, and sales staff work together to meet and exceed the requirements of our business clients. Using a team-based service approach has enabled our organization to develop strong partnerships with both our clients, as well as our solution partners.

We tightly integrate our solutions with the products and services of leading partners such as Cisco Systems, Sun Microsystems, and Oracle Corporation to ensure peak performance.

Make the Connection

Connecting your business to the Internet in today's global market is critical. Speed and reliability can not be sacrificed. At Internet Light and Power we understand the dynamics of your business and provide several high-quality access offerings to meet your company's needs. Our complete range of access services will help support your organization and provide your business with the flexibility needed to prosper in today's market. From high-speed ADSL to T3 connections, Internet Light and Power can provide your organization with the right access solution.

ILAP Media

ILAP Media, Internet Light and Power's development division, combines a wide range of development expertise with marketing know-how to aid our clients in establishing their business on the Internet. Our technical expertise covers a wide range of technologies, including: Oracle, ColdFusion, Perl, Java, Flash, HTML and XML.

Backed by Internet Light and Power, we are able to provide a wide range of development services as well as strong web hosting capabilities. From complex database and application development to customized web experiences, ILAP Media is your complete solution provider.

Web & Database Hosting

Outsourcing your hosting requirements to Internet Light and Power will provide your organization with high-speed redundant connections to the Internet, daily tape backups of data, 24x7 monitoring of your connection and the support of our superior technical staff.

Co-Location

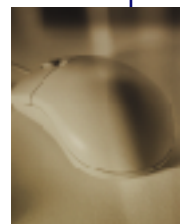

Internet Light and Power provides clients with a secure and fully monitored co-location environment. This enables organizations to take advantage of ILAP's 99.975% uptime supported by redundant connections to the Internet, fail over / load balancing of duplicate servers, redundant power support and 24x7 monitoring of facility and connection.

E-mail

Internet Light and Power is a world leader in the provisioning of corporate, distributed e-mail. We offer our clients complete solutions to address their mail handling requirements such as envelope re-addressing, mailing lists and mail redirection. At Internet Light and Power, we can meet the demands of any complex e-mail environment.

Connect to the Power of Business

Internet Light and Power is your source for complete Internet Business Solutions.
